

## MPM PROTECTION

**MPM Protection** is MPM - **Moulages Plastiques du Midi** -'s response to the new challenges facing our Armed Forces in terms of tactical, modular and mobile equipment. The products in the **MPM Protection** range are designed to protect and built to last.

**MPM Protection** embodies a new generation of holsters and tactical solutions: agile, robust, ergonomic and with a fluid design. Each element is designed to reinforce without weighing down, protect without constraining, and connect without distracting.

In environments where every second counts and every movement can make a difference, we place these ambitions at the heart of our mission and historical expertise. We are convinced that the plastic injection moulding used by MPM brings three major qualities to our products and projects: strength, ergonomics and lightness.

These three assets may seem contradictory, but they are highly valued by operational units to meet their 'all-terrain, all-weather' needs.

The products in the **MPM Protection** range are designed to protect, built to last, and optimise action without restricting it.

## MPM by ETIENNE LACROIX GROUP

The **Etienne Lacroix Group** is a pyrotechnic systems integrator, providing applications for the defence, law enforcement, and civil security sectors.

# MPM

A subsidiary of the Etienne Lacroix Group, **Moulages Plastiques du Midi (MPM)** specialises in the design and manufacture of thermoplastic components for the healthcare, aeronautics, defence and construction sectors. The company recently invested in (and inaugurated) an extension to its factory covering more than 1,800 m<sup>2</sup>, doubling its surface area and equipping itself with production facilities that meet the most stringent requirements in terms of production standards, safety and comfort. With a turnover of nearly €15 million in 2024, MPM develops high-quality, innovative products and has been relying on its design office to bring these equipment development projects to fruition since 1952.

## HOLSTER RANGE

*Protecting individuals, optimizing the action*

# MPM

PROTECTION

## HOLSTER Kit - 1 - STD

- 1 Active retention + 1 passive retention
- Compatible with GLOCK 17/19/26 Gen IV and V
- Protects the sight & magazine release button
- Removable barrel protection plate
- Compatible with existing mounting platforms on the market
- Smooth and silent operation
- Right-handed or left-handed models available
- Sold with a belt/torso plate

Technical Data:  
Dimensions: 183 x 75 x 45 mm  
Weight: 103 g

## ACCESSORIES

### SPRING PLATE

*New patented concept\**  
Quarter-turn locking  
Easy and quick one-handed release  
9 positions  
Robust and lightweight

\*INPI certificate

Can be attached to Standard or Molle loops  
Fits on vests or belts  
Not sold individually (included in the kit)

Belt/torso  
platform

Thigh platform  
(optional)

High-thigh carry  
Elastic straps

Kits and equipment are available in:

Black

Army /Camo

Tan /Desert

## HOLSTER Kit - 1 - OPS

Holster Kit - 1 - STD, with additional compatibility:  
Compatible with TLR 1 and TLR 2 lights  
Works with viewfinders  
(list of compatible optics available on request)  
Sold with a belt/torso plate

Technical Data:  
Dimensions: 172 x 122 x 54 mm  
Weight: 174 g
