

MPM PROTECTION

MPM Protection is MPM - **Moulages Plastiques du Midi** -'s response to the new challenges facing our Armed Forces in terms of tactical, modular and mobile equipment. The products in the **MPM Protection** range are designed to protect and built to last.

MPM Protection embodies a new generation of holsters and tactical solutions: agile, robust, ergonomic and with a fluid design. Each element is designed to reinforce without weighing down, protect without constraining, and connect without distracting.

In environments where every second counts and every movement can make a difference, we place these ambitions at the heart of our mission and historical expertise. We are convinced that the plastic injection moulding used by MPM brings three major qualities to our products and projects: strength, ergonomics and lightness.

These three assets may seem contradictory, but they are highly valued by operational units to meet their 'all-terrain, all-weather' needs.

The products in the **MPM Protection** range are designed to protect, built to last, and optimise action without restricting it.

MPM by ETIENNE LACROIX GROUP

The **Etienne Lacroix Group** is a pyrotechnic systems integrator, providing applications for the defence, law enforcement, and civil security sectors.

MPM

A subsidiary of the Etienne Lacroix Group, **Moulages Plastiques du Midi (MPM)** specialises in the design and manufacture of thermoplastic components for the healthcare, aeronautics, defence and construction sectors. The company recently invested in (and inaugurated) an extension to its factory covering more than 1,800 m², doubling its surface area and equipping itself with production facilities that meet the most stringent requirements in terms of production standards, safety and comfort. With a turnover of nearly €15 million in 2024, MPM develops high-quality, innovative products and has been relying on its design office to bring these equipment development projects to fruition since 1952.

ACCESSORIES RANGE LAW ENFORCEMENT

MPM

PROTECTION

AEROSOL GRIPS

DESTINATION

Compatible with aluminum aerosol canisters
 Ø53mm or Ø65mm
 (contact us for other dimensions)
 This grip model was developed for canisters
 containing tear gas

PRESENTATION

Parts made of injection-molded thermoplastic
 reinforced with fiberglass
 1 aerosol grip = 1 trigger
 + 1 safety lock
 + 1 left half-grip
 + 1 right half-grip
 Colors: black with red trigger and safety lock

ADVANTAGES

System is customizable and adaptable for other
 applications, e.g., paints, cleaners, insecticides,
 lubricants... (contact us):

- Allows for more practical and cleaner spray
 diffusion
- Reduces finger fatigue (good ergonomics)
- Red, self-breakable indicator upon first use

HOLSTERS

1 Active retention + 1 passive retention
 Compatible with GLOCK 17/19/26 Gen IV and V
 Sight and magazine release button protection
 Removable barrel protection plate
 Compatible with existing market mounting
 platforms
 Smooth and silent operation
 Right-handed or left-handed models available
 Sold with belt/torso mounting platform

Holster Kit - 1 - STD

Holster Kit - 1 - OPS*

Spring plate

SPRING PLATE

*New patented concept***

Quarter-turn locking
 Easy and fast one-hand unlocking
 9 positions
 Robust and lightweight

Belt/torso
 platform

Thigh platform
 (optional)

High-thigh carry
 Elastic straps

*Available in a version for GLOCK equipped with a sight and tactical light
 **INPI certificate

PAPILLARY SUPPORT

DESTINATION

Phone holder for a CROSS CALL
 CORE X4 NEO type phone, for lifting fingerprints
 during operations conducted by a Judicial Police
 Officer

PRESENTATION

1 phone holder body
 4 feet to be screwed onto the body, stored inside
 the body
 Color: black

ADVANTAGES

Practical, solid, discreet, and easily transportable
 system
